

CLS-3252 - Linear Stage with EDU

Linear stages of the CLS series were consistently designed for high availability applications in science and industry. They are equipped with SmarActs exchangeable drive units which guarantees easy access to the stage's core component, the piezo-drive. That makes servicing a very simple task. The drive unit can be exchanged without removing the complete device from the surrounding positioning setup. Additionally, their mounting hole pattern is perfectly matched to mount our rotation stages and goniometers. The middle size stage of the CLS-32 series offers a travel range of 31 mm while maintainig a footprint of only 32 x 52 mm. It is able to handle payloads of up to 30 N.
