

SMARPOD Control Software

Main Features:

- Can handle different **SMARPOD** configurations, incl. position of the Pivot point.
- Allows to store up to 10 **SMARPOD** poses (absolute axis positions) which can easily be recalled with a mouse-click.
- Several possibilities to move the **SMARPOD** including your computer mouse, **SMARPOD** hand controller or a 6D mouse.

The **SMARPOD** Control Software is a graphical user interface, which can control all current **SMARPOD** models.
